Reissue Applications

1. Claims 30-65 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc.* v. *Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp.* v. *United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue, which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

In reviewing of the prosecution of parent application No. 08/997,035, which matured into US Patent No. 6,054,872, reveals that amendment A filed 10/27/1999 (paper No. 6) to include limitation "each of the basic cells being configured as a rectangular pattern region having a height substantially identical to said determined height..." Furthermore, applicant argues that "there is no disclosure or

Application/Cont. 131

Application/Control Number: 09/963,735

suggestion of cells configured to be rectangular pattern regions having different widths so that the standard cells include first and second type cells."

Allowable Subject Matter

- 2. Claims 1-32 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

With respect to claims 1 and 19, in addition to other elements in the respective claims, the prior art does not teach a circuit having a gate array basic cells formed in an empty space of a predetermined cell row, each of the basic cells being configured as a rectangular pattern region having a height substantially identical to the predetermined height of standard cells and a width equal type a width of first type cell, the width of the basic cells not being equal to a width of second type cell.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Client/matter

4. The client/matter number for this application has been changed to 016910/0476 as requested by applicant.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Don P Le whose telephone number is 703-308-4890. The examiner can normally be reached on 7AM - 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J Tokar can be reached on 703-305-3493. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7724 for regular communications and 703-308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
